

5

Clyde Wind Farm in Scotland has the largest number of onshore wind turbines in the UK. 206 turbines generate enough renewable energy to power over 290,000 homes each year!

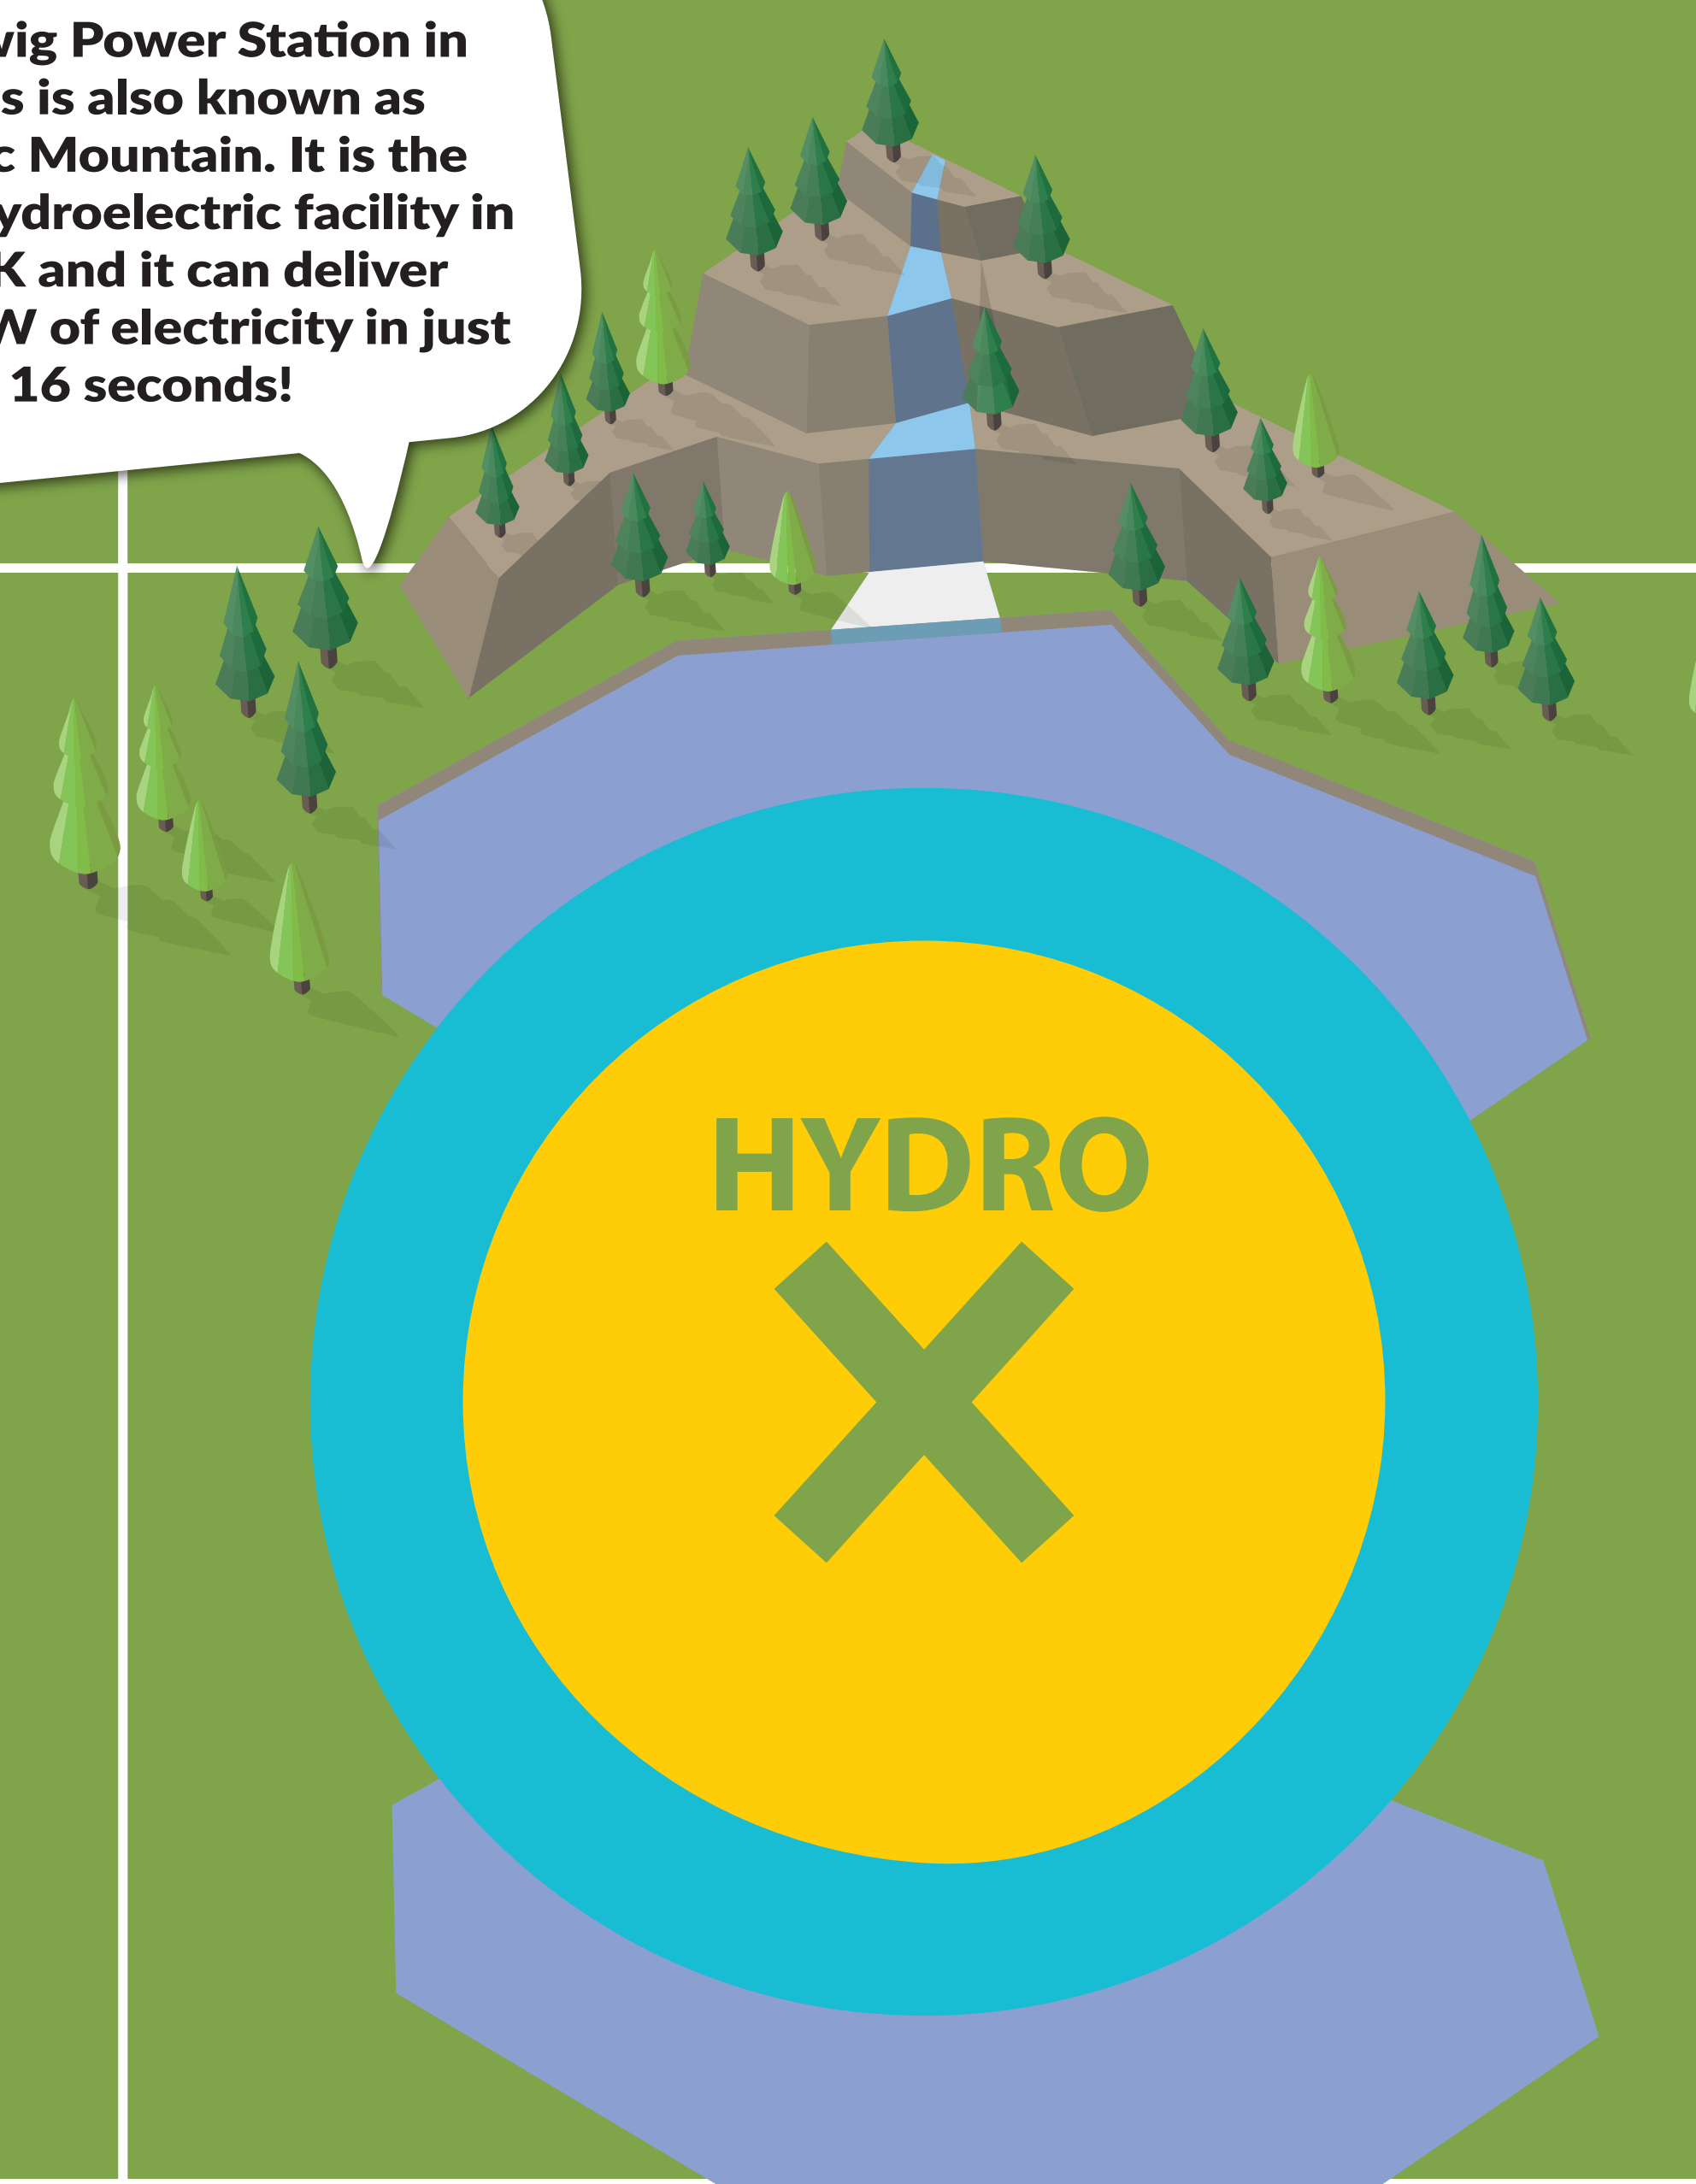

Drax Power Station in England provides 6% of the country's electricity needs. It uses biomass pellets which contain wood and plant material. Up to 80,000 tonnes of biomass pellets are stored in biomass domes - these domes are taller than Blackpool Pleasure Beach's rollercoaster 'The Big One'!

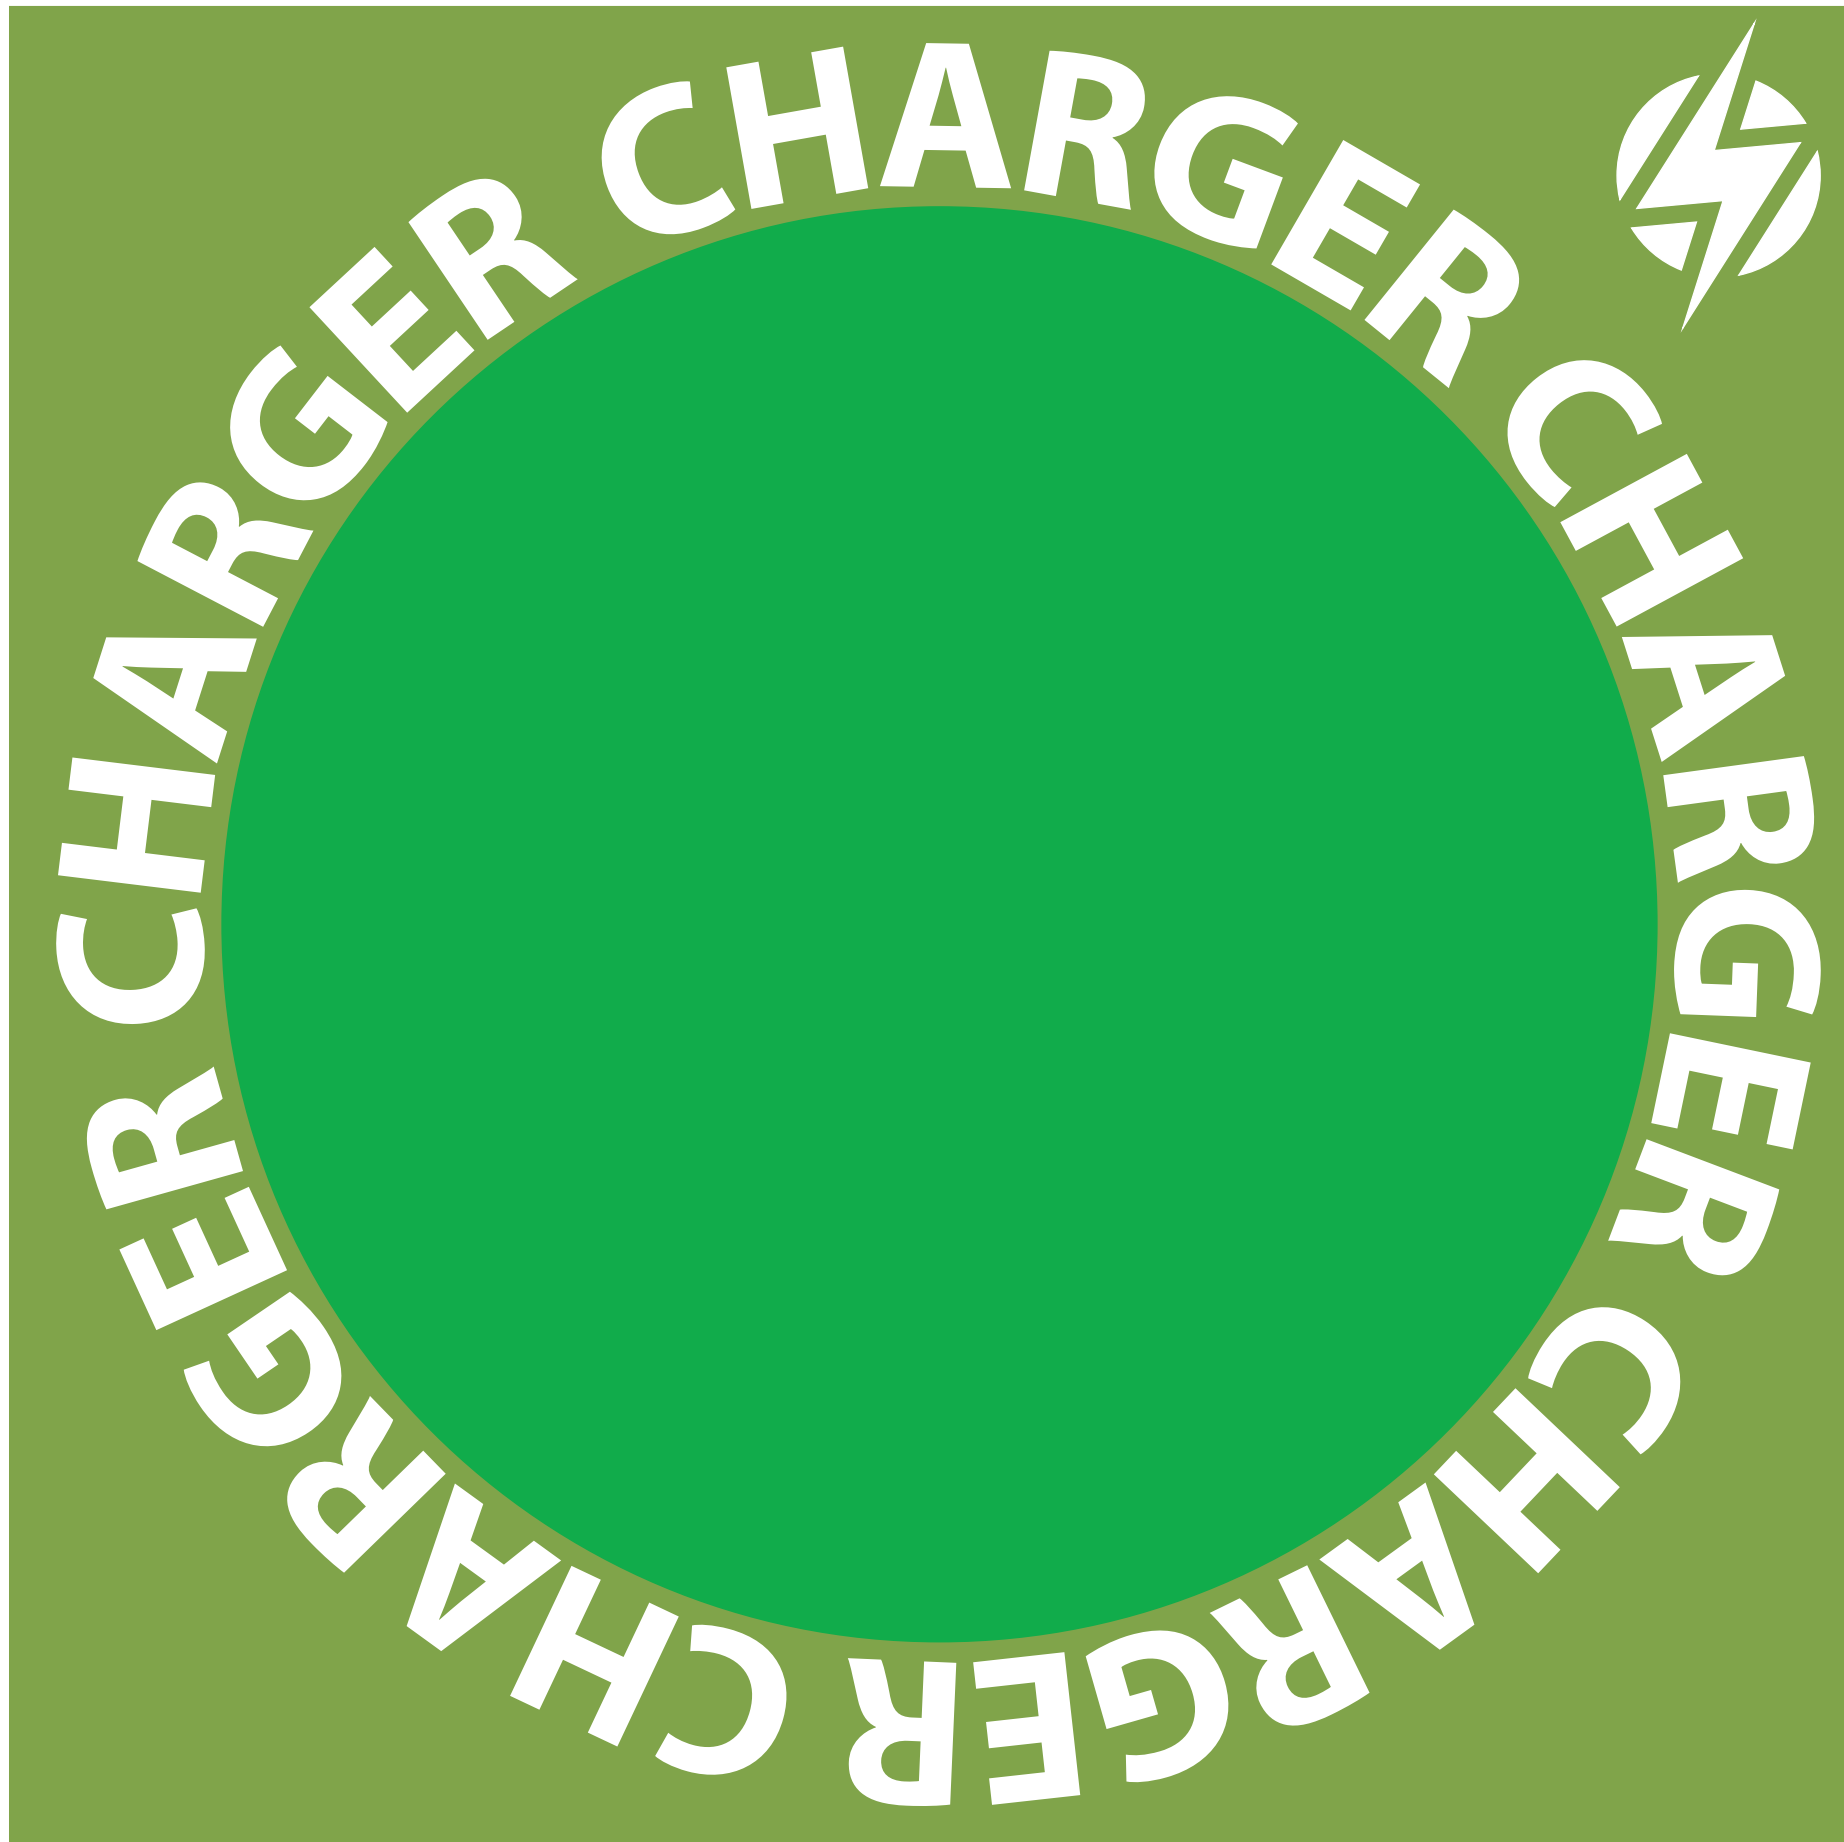

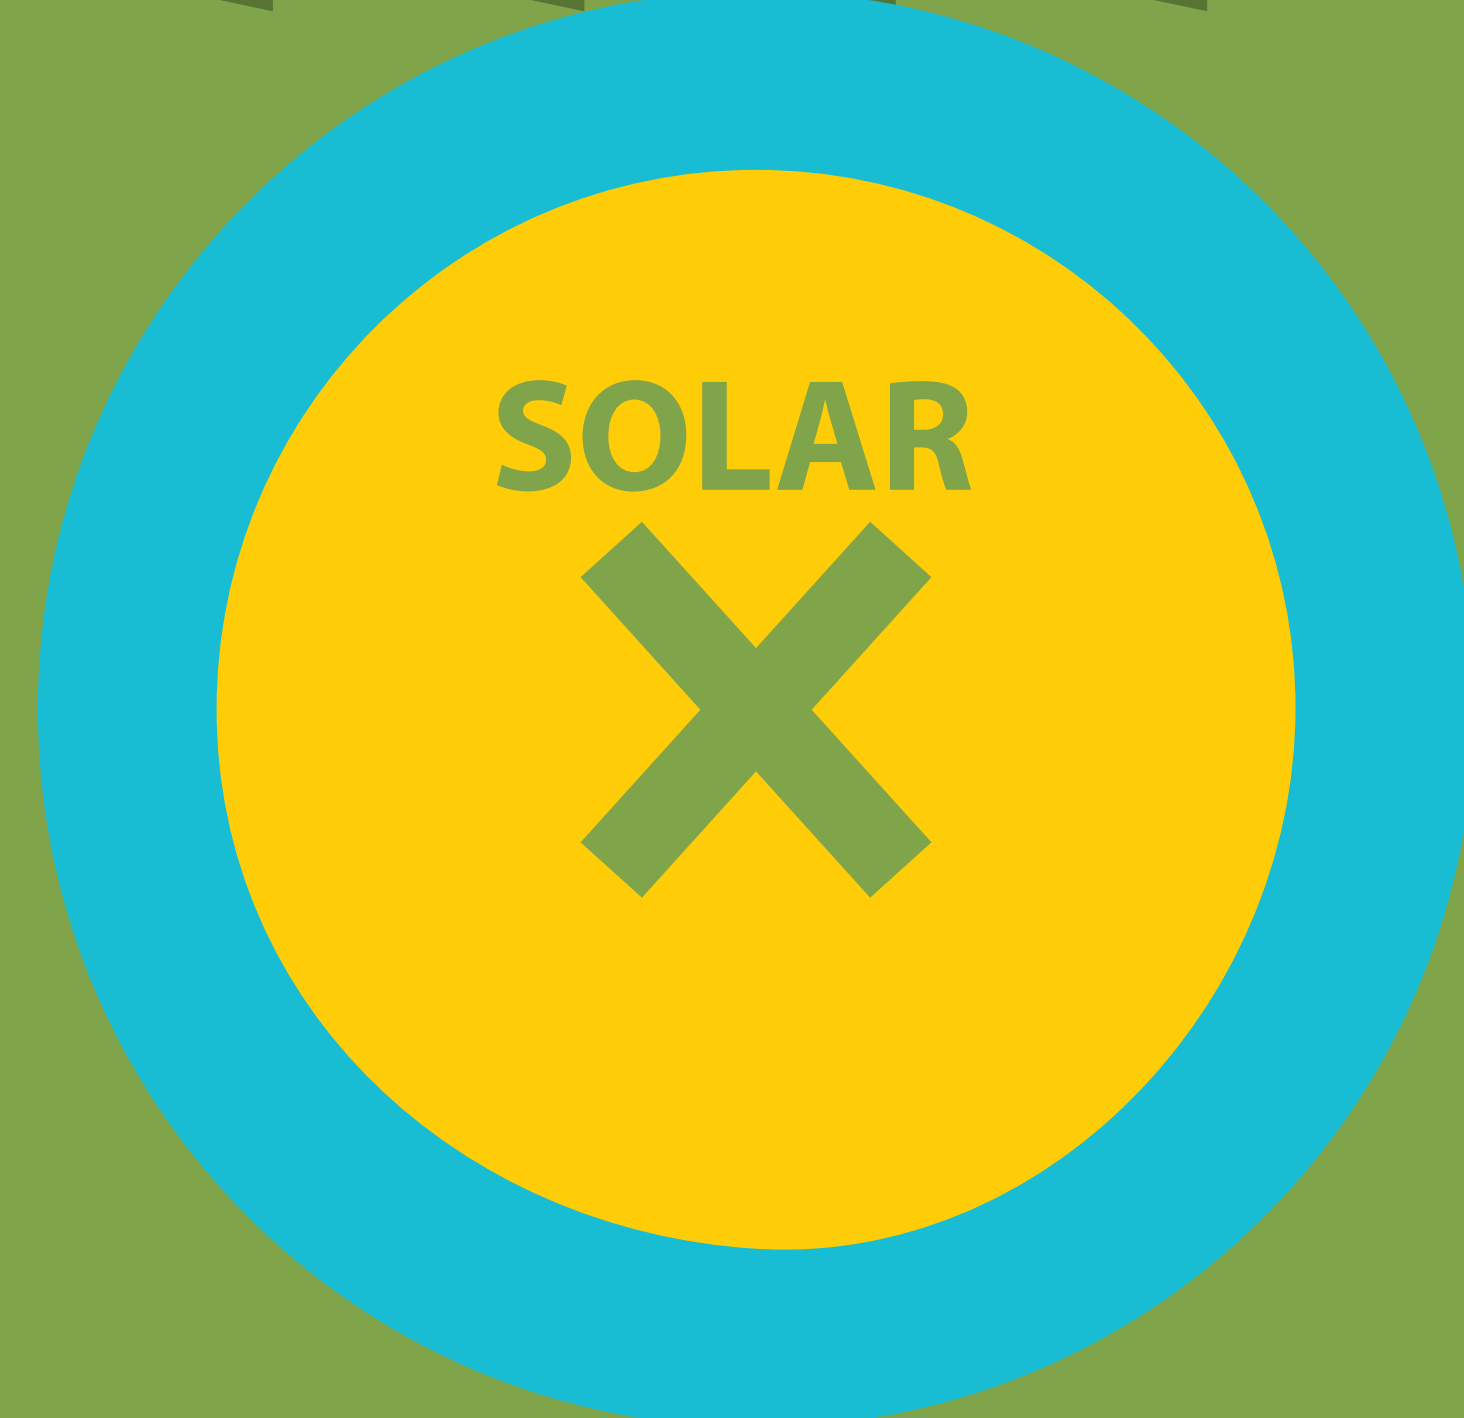

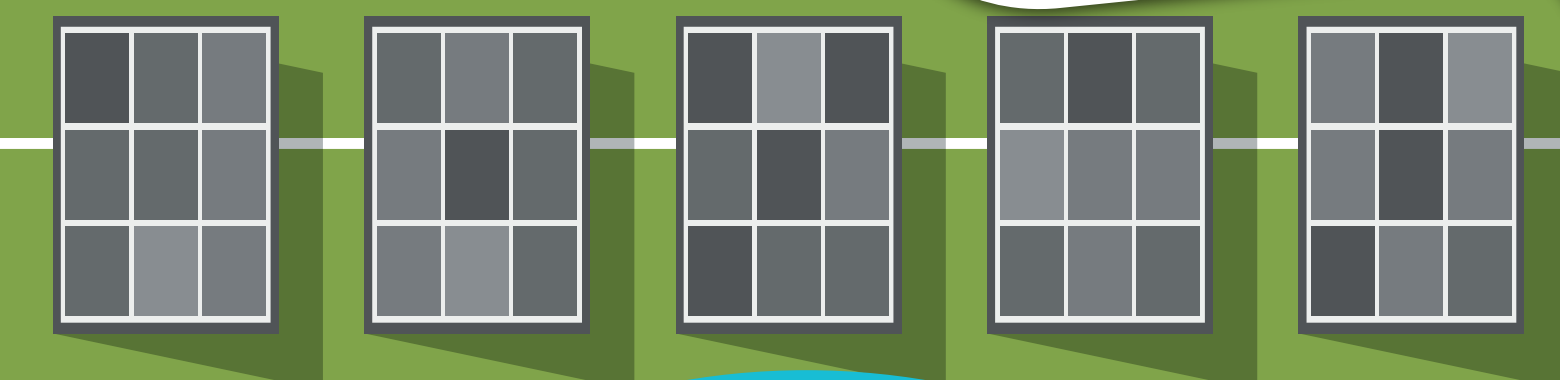

4

Dinorwig Power Station in Wales is also known as Electric Mountain. It is the largest hydroelectric facility in the UK and it can deliver 1,728MW of electricity in just 16 seconds!

Westmill Solar Park in England is a community-owned solar farm. It has over 20,000 solar panels which can power around 1,600 homes each year!
