CYBERFIRST ADVANCED VIRTUAL SUMMER COURSE

Course availability: all places are full, accepting reserve applications

This fully funded online course is aimed at attracting a diverse range of students, typically between 16 and 17-years-old, to hone the skills and behaviours you need to enter the cyber security or tech-based workplace for real. *It is open to students currently in Year 12 (England and Wales), S6 (Scotland) and Year 13 (Northern Ireland) in the 2021/22 academic year.* Places are limited so sign up now and secure your spot!

CyberFirst Advanced will build advanced skills in some key areas of cyber security. The course is designed to expand the knowledge of students already studying computer science or who have a passion and aptitude for all things tech. Gain skills in areas including digital forensics, encryption technologies, penetration testing and open-source intelligence techniques. These skills will help you and your friends and family stay safe online.

This event includes the following:

- Implementing digital forensics
- Understanding encryption technologies
- Using open-source intelligence techniques
- Penetration testing
