CYBERFIRST ADVANCED WEST LONDON

Course availability: all places are full, accepting reserve applications

This fully funded, five-day residential course is aimed at attracting a diverse range of students, typically between 16 and 17-years-old, to build advanced skills in some key areas of cyber security. *It is open to students currently in Year 12 (England and Wales), S6 (Scotland) and Year 13 (Northern Ireland) in the 2021/22 academic year.* Places are limited, so sign up now to secure your spot!

CyberFirst Advanced will hone the skills and behaviours you need to enter the cyber security or tech-based workplace for real. The course is designed to expand the knowledge of students already studying computer science or who have a passion and aptitude for all things tech. Gain skills in key areas including digital forensics, encryption technologies, penetration testing and open-source intelligence techniques. These skills will help you and your friends and family stay safe online.

This event includes the following:

- Implementing digital forensics
- Understanding encryption technologies
- Using open-source intelligence techniques
- Penetration testing
